# I/O FORMAT

# 11

The MM5V1/2 Modeling System Output Format 11-3

Header Arrays 11-4

Special Header Locations 11-4

Header Record for TERRAIN Output 11-5

TERRAIN output fields 11-6

Header Record for DATAGRID Output 11-7

DATAGRID output fields 11-8

Header Record for RAWINS Output 11-9

RAWINS output fields 11-11

Header Record for RAWINS Surface FDDA Output 11-11

Surface FDDA output fields : 11-12

Header Record for Model Input 11-12

Model input fields 11-14

Header Record for Model Output 11-14

Model output fields (most coupled with Pstar, F*P*) 11-20

Header Record for Interpolated Model Output 11-21

Interpolated model output fields 11-23

A Program to Read MM5 Output 11-24

Special Data Format in MM5 Modeling System 11-30

Data format for observational nudging 11-30
Description of observational nudging variables 11-30
Data format for MM5 boundary file 11-30
Description of boundary file variables 11-32
Data format for surface observations file 11-33
Description of surface observation variables 11-34

Data format for upper-air observations file 11-34
Description of upper-air observation variables 11-34
Data format for raw upperair observations file 11-35
Description of raw upperair observation variables 11-35
