

P1 NCAR research data archive datasets useful for WRF

Peng, Grace S., *National Center for Atmospheric Research*

The NCAR Research Data Archive offers many datasets suitable for use in WRF model runs. This presentation will highlight our holdings that are most useful for WRF.

We'll give specific examples of how to ingest various GRIB1 and GRIB2 datasets into ungrib. We'll also demonstrate how to use our web interface to place a custom order for surface, upper air and satellite data in little_R format, ready for data assimilation and obs-nudging.
